

ADVERSE EFFECTS OF VACCINES

This spreadsheet summarises scientific research on adverse effects of vaccines. The columns are vaccines, the rows are adverse effects, and the numbers are the PubMed Identifiers of scientific papers identifying links between the vaccine and the adverse effect. The colour coding on rows, columns and cells reflects the evidential base - the darker the shade, the more papers. The papers are listed on the US National Library of Medicine - see below for instructions on looking up abstracts for these papers. The spreadsheet is downloadable from <http://campaign-resources.org/>.
